PREFACE TO THE DOVER EDITION

SINCE *1234 Modern End Game Studies* first appeared in 1938 numerous errors have been discovered and I have taken the opportunity of this Dover republication to have them corrected wherever possible. Typographical and other trivial errors have been amended silently in the body of the text. The "Errata" section discusses every ending which has been "cooked," i.e., shown to be in error, either by me or by colleagues with whom I have been in correspondence, and in many cases the original ending has been restated in such a way as to make it sound.

There are a number of other endings which reliable correspondents have cooked, some of them a long time ago, but owing to the work involved looking up old files and writing out the demolitions they have not found the time to be more explicit. A. Chéron has cooked endings Nos. 14, 36, 60, 88, 111, 125, 180, 263, 303, 333, 346, 394, 423, 425, 433, 484, 499, 502, 505, 514, 596, 598, 636, 644, 669, 721, 772, 835, 868, 912, 946, 1016, 1021 and 1203, and considers endings Nos. 603 and 1185 suspect; Rabinovitsch has cooked ending No. 119, Bron ending No. 582, and a Russian endings Nos. 150, 393 and 420, whilst Malpas has demolished ending No. 1198. No. 477 is also incorrect. In addition, A. Chéron has discovered a dual to No. 247 and many duals to No. 491; H. Rinck knew of a dual to No. 1050.

I wish to thank all those who have helped me discover flaws and errors and in particular my old and good friends André Chéron and Walter Korn.

H. M. LOMMER.

August, 1967.*

PREFACE TO THE FIRST EDITION

THE aim of this book is to give permanent habitat to the very considerable amount of excellent work which has been accomplished in end-game composition since the publication of "A Thousand End-games," by Mr. C. E. C. Tattersall more than 25 years ago.

To mention by name all those to whom we are indebted would necessitate naming everyone. Instead we convey our thanks and acknowledgment collectively and except for especial mention F. Dedrle for his many examples of Eastern European composers whose work was not readily available, Messrs. Duras, Fuchs, Havasi, Halberstadt, Henneberger, Holm, Karstedt, Lazard, Prokes, Prokop, Przepiorka, Rinck, Sehwers, Troitski and Count de Villeneuve Esclapon for selecting the examples from their own work, Messrs. Gorgiev, Kaminer, Korolikov, Liburkin, Neumann and Simchovitch for sending almost all the examples of the modern school of composers in the U.S.S.R.

Acknowledgment of indebtedness also to André Chéron and Dr. Fischer for their respective Introductions, Messrs. L. Alexander and G. C. Burger for assistance in proof reading and to L. Downing for his translations from the Russian.

M. A. SUTHERLAND,
H. M. LOMMER.

INTRODUCTION

BY

ANDRÉ CHÉRON.

(Three times Champion of France, Author of the "Traité Complet," "Les Echecs Artistiques," Chess Editor of "Le Temps," "L'Illustration," "Journal de Geneve," etc., etc.).

END-GAMES may be roughly divided into two types, viz., artistic and didactic. Despite their similarity in appearance their respective aims are different. In my book "Traité Complet d'Echecs," I have exhaustively considered the didactic end-game. The authors of the present book cover an essentially different sphere, viz., the artistic end-game.

The sole aim of the didactic end-game is to be of use to the player of chess by giving him a few general rules which are easy to retain, and which will enable him to perceive the ultimate result in certain elementary positions. In this way he will learn with little risk of error, if the complex content of a certain position leads either to a win or a draw and to know the easiest and safest method of achieving this. Didactic end-games are elementary positions from which all unnecessary forces are absent, the presence of which would change a general position into a particular one without practical value.

From this it will be seen that it seldom has a beauty component, when it has it is accidental, as its primary aim is not beauty but utility in providing guidance for practical play. Should a didactic end-game have more than one solution this is not a fault, as it would be in an artistic end-game, as a multiplicity of solutions renders the task of the player easier. To state an example: to teach a beginner to mate with Bishop and Knight against the lone King, really means to practise the didactic end-game. In this example there will, of course be thousands of possible solutions, and the more ways there are the easier it will be to achieve.

In the artistic end-game things are essentially different. Here the *sine qua non* condition is soundness. Before everything an artistic end-game must be sound and have only one solution. This reason will be understood after we have stated that its aim is not to instruct, but to please, and to astonish the solver by some extraordinary combination. This, however, does not mean that the content of such a composition necessarily bears the character of a record. It

means that the content must be out of the ordinary, and have little in common with the banality of the every-day game. The end-game must charm and give a sensation of beauty wherein are compounded surprise and astonishment, and admiration for the genius of the composer. It must give that intellectual joy which can be communicated to all minds capable of enthusiasm for a common interest. The artistic end-game is the poetry of chess, whereas the didactic is the science and grammar. The principal aim of the artistic end-game is to please. The means? All are allowed, one alone is ruled out—the tedious!

As soon as the artistic end-game pleases, it has established its *raison d'être*. Of little consequence are the means by which this is done; that depends on the talent and conception of the composer.

The reason why an artistic end-game must have only one solution is now evident. Its aim is not to mate or draw, but the manner by which these ends are brought about. Figuratively speaking, I would say that the aim of the composer is not what the solver will find at the end of the road, but the beauty along the trail leading to the stated conclusion. Should there be more than one solution the solver may easily take the prosaic lane and thereby miss the flowers strewn along his path by the composer and at the end, having missed the right way, ask himself what could have been the reason for this stupid ambling.

Does this mean that the artistic end-game is of no value, and that utility is the attribute of the didactic alone?

Personally I have always maintained the contrary. The utility of the artistic end-game is not that of the didactic, but in that it offers a possibility of using one's imagination. It does this not by tedium, but in pleasing and in developing one's taste for beautiful combinations. A boxer does not only train by boxing, he also does road work to develop and increase his staying power, etc.

The player who would shun the artistic end-game would thereby deprive himself of a spiritual training which is as useful as it is pleasing. If to this disregard he adds that of the problem, he can compliment himself in the knowledge that out of the noble game of chess he has drawn only one third of its potential intellectual enjoyment. The artistic end-game has this advantage over the problem in that it presents riddles of a similar nature to those of the practical game.

This alone should render it popular among players—who have never had the opportunity of giving mate in five moves in an actual game even if they have announced it. This, however, does not imply that I consider the art of the problem inferior to that of the artistic end-game. I consider that the game of chess has three components, all of which are equally fascinating : the game itself, the artistic end-game and the problem. Anyone who wishes to excel in any one of these must necessarily specialise. This is in the nature of things. The great mass of players, however, who may not dream of laurels and who simply seek without discrimination in the King of Games an inexhaustible source of intellectual joy, cannot know too well these three aspects to reap all it contains in intellectual wealth.

It is to the great merit of the authors of this volume to have undertaken an anthology of the poetry of chess, which is :

THE ART OF BEAUTIFUL COMBINATIONS.

ANDRÉ CHÉRON.

Leysin, May, 1938.

INTRODUCTION

BY

DR. J. C. A. FISCHER,

END GAME EDITOR OF THE "DE SCHAAKWERELD."

THIS work gives a comprehensive review of the development of the end-game to date.

Since the publication, 25 years ago, of Mr. C. E. C. Tattersall's "A Thousand End-Games," which this compilation closely follows in form, two points are easily discernible:—

(i) the phenomenal growth in the interest taken in end-games, and

(ii) the increase in the number of composers.

So much for the quantitative aspect. The qualitative aspect is not so easy to assess, and it cannot be stated with certainty that the quality is noticeably higher. In the first decade of this century there existed masterpieces which presented ideas in a perfect form. Since the publication of the above-mentioned work, it is in the thematic end-game that development has been greatest.

It is not generally known that the Dutch end-game and problem composer, H. Weenink (whose death at such an early age is so deplored), outlined a scheme of classification of end-games. This appeared in 1928 in an article in a local journal and has been reprinted in the "Weenink Gedenkboek" (Memorial Book) Amsterdam-Harlem, 1932. The pregnant part of this article is that the author distinguishes three schools in the end-game:—

- (i) Natural School,
- (ii) Artistic School,
- (iii) Thematic School.

The Natural School of end-games comprises studies with simple and slight material, a natural position (by natural is meant probable, as arising out of play), and "finesse" of solution where, having the "move," frequently plays the dominant role. Outstanding composers of this School are the late Richard Réti, Selesniev, Grigoriev, Halberstadt, Moravec and Hasek. These names are taken more or less at random and it is not to be understood that others are less important in this School.

The Artistic School is, in the first place, characterised by its form. Economy, absence of duals, liveliness of the variations, purity of stalemate positions (many stalemate

studies belong to this group) and a natural open position are elements which are found in the Artistic end-game. The School has not many significant figures, the most important being Henri Rinck, the number of whose compositions now passes the thousand. K. A. L. Kubbel, and many of the modern Russian composers, also belong to this group.

The Thematic School presents studies with cameo-clear ideas (themes). In many instances the theme is realised only at the cost of the form and naturalness of the position. This, however, is not inherent, as may be seen in a number of examples in this collection. These themes are derived from the territory of the problem, Novotny and Plachutta interferences, Bristol, Indian and Roman ideas. Other themes are more specific for the end-game, and can be developed better there. These are the "marche en escalier," fortification theme, eternal attack, auto-stalemate, and the notable composers are Simchovitsch, Korolikov, Kok, etc.

These schools, however, are not so sharply distinguished as are the schools of problem composition, the Bohemian and the Neo-German, etc., and it is not possible to classify many of the end-games as they contain thematic and artistic, and thematic and natural elements together; in other words all sorts of combinations of the elements of the three schools are to be found. (A. O. Herbstmann calls this synthesis the "realism"). In addition to this, most of the composers do not restrict themselves to one "School" but present to us all three, as do A. A. Troitski, Gorgiev, Herbstmann, etc.

To return, although the first two Schools, the Natural and the Artistic, continue to develop and have not reached the point where further advance can no longer be envisaged, development takes place in depth and complexity rather than in new ideas.

The Thematic School, however, is developing and extending its scope, new themes being constantly discovered and successfully presented in end-game form. At present it cannot be said where the limit of development will be, if the idea of limit can be held to apply to the ingenuity and creativeness of the human mind.

This work presents the most famous examples and is a comprehensive documentation of the end-game and a valuable addition to its literature.

DR. J. C. A. FISCHER.

Weert (Holland),
July, 1938.

PUBLISHER'S NOTE

THESE is one feature of this book which makes it vastly superior to its predecessors. The algebraic notation is used—and is used in its most commonsense form. From a purely scientific standpoint, the use of the most abbreviated form of the algebraic notation which merely gives the starting square and the finishing square and makes no special note of captures might have been more logical. Admitted that its use is perhaps an experiment with the present work, but End-Game composition is closely allied to Problem composition, and problemists use an almost identical form of notation to that adopted in the present work.

It has so many advantages that in order to forestall criticism, some of them are enumerated:

Every square has one name only instead of two.

The confusion between the King's side and the Queen's side does not exist.

The confusion between White's and Black's side of the board is banished.

The FORM of notation is much more simple.

The liability to make errors in playing the moves on the board is practically eliminated.

The system is much more easily learned.

We are brought into line with several European countries using this system—which is capable of universal application.

Even its opponents admit many of these advantages, but so conservative are we that our archaic form of Chess notation persists, just as we continue to drive on the left-hand side of the road, to handicap ourselves in the World's affairs by refusing to adopt the decimal system for our calculations and the metric system for weights and measures, etc.

It is to be hoped that the present experiment suffices to convince British Chess players. The contents of the book will achieve World-wide approval and equally it is hoped that its form of presentation will be acclaimed.

Even without a table giving the names of the pieces in all the European languages, the book should quickly be understandable by any Chess player, whatever his nationality—another and very obvious reason for the adoption of the algebraic notation.

Maybe—soon—we shall see a tournament book published in this form.

W. H. WATTS, *Publisher.*

NOTATION

The following diagram will be helpful to those not familiar with the algebraic notation.

EXAMPLE: SOLUTION TO No. 967

ALGEBRAIC NOTATION:

1, b7†, Kb8; 2, Ktd4, B×Kt;
3, Bf2, Be5†; 4, Kf5, B×Kt;
5, B×Kt, Re5†; 6, Kf6, Re4†;
7, Kf5, Rh4; 8, Kg5 =

EQUIVALENT ENGLISH NOTATION:

1, P-QKt7†, K-QKt1; 2, Kt-Q4, B×Kt; 3, B-KB2, B-K4†; 4, K-KB5, B×Kt; 5, B×Kt, R-K4†; 6, K-KB6, R-K5†; 7, K-KB5, R-KR5; 8, K-KKt5 =

EXPLANATION OF SYMBOLS USED

In Diagrams—

+ White to play and win.
= White to play and draw.

In Solutions—

+ Wins. = Draws. † Check.
‡ Mate. × a Capture.

NAMES OF THE CHESS PIECES IN
FRENCH & GERMAN LANGUAGES.

Symbols used in this book.	English.	Abbreviated as used in this book.	French.	German.
	King	K.	Roi	König
	Queen	Q.	Dame	Dame
	Rook	R.	Tour	Turm
	Bishop	B.	Fou	Läufer
	Knight	Kt.	Cavalier	Springer
	Pawn	P.	Pion	Bauer

This table is included to assist foreign readers.

CLASSIFICATION OF POSITIONS
IN APPENDIX

Pawns only	8, 9, 17
One Knight	13, 18
One Bishop	16
Bishop v. Bishop (same colour)	15
Bishop v. Bishop (opposite column)	4
More Bishops	2
Bishop v. Knight	5, 10, 19, 24	
Rook v. Knight	11
Various combinations of Bishops and Knights	1, 7, 22, 23	
Various combinations of Rooks and Knights...	20
Various combinations of Rooks and Bishops	12, 21	
Rooks, Bishops and Knights	6
Rook v. Rook	14
Queen v. Rook	3

ERRATA

26—The source is wrong. This world famous ending was first published in the "Sunday Express," Dec. 1921, as follows: Wh. Kd8, Be1, Pa5, h6/Bl. Ka7, Ra6, Pa4, b7 wins. 1 Bf2 †, Kb8; 2 Bb6, R × B; 3 P × R, a3; 4 h7 etc.,—see solution.

28—Cooked: 5 Kg2 or g1, Kc4; 6 f6, d3; 7 f7, d2; 8 f8 (Q), d1 (Q); 9 Qf1 † also wins. Chéron published his own correct version in the "Journal de Genève," 1955. Wh. Kh1, Pf3, h3/Bl. Ka3, Pc7, d7, h2 wins. 1 f4, Kb4; 2 h4!, d5; 3 f5!, Kc5; 4 h5!, d4; 5 f6, Kd6; 6 h6, d3; 7 f7, Ke7; 8 h7, d2; 9 f8 (Q) †, K × Q; 10 h8 (Q) † wins.

62—Faulty. The dual: 5 Ke6!, Kf8; 6 g3(h3), g5; 7 h3(g3), g6; 8 f7, h5; 9 h4 also wins.

100—Cooked by 2, Kc7! wins.

109—Cooked by A. Chéron: 1 P × P, b2; 2 Ktc6, b1 (Q) †; 3 Ktb4 † followed by 4 Ktf6 and 5 Kt(f6)d5. Chéron corrected by adding a black pawn on "b7."

116—The solution says 4 Kb7(c7) wins. This is not so e.g. 4 Kc7?, Kt × Kt; 5 a7, Ktd5 † and 6....., Ktb6 draws. Therefore only 4 Kb7! wins.

146—Demolished by 2, Be2 draws. A. Chéron published his own version in the "Journal de Genève," 1955: Wh. Kd7, Bf3, Pg2/Bl. Kf4, Pa6, g5, h4 draw. 1 Bc6!, Ke5!; 2 Kc7, a5!; 3 Bd7!!, Kd5; 4 Kb7!!, Kc4; 5 Kc6!, a4; 6 Kd6, a3; 7 Ke5!, Kd3; 8 Be6, Ke3; 9 Kf5 drawn. Chéron's analysis covers two and a half pages of print, and the above short solution hardly does it justice.

177—Cooked: 1 b4, Bd1! draws e.g. 2 b5, Ba4!; and amended by placing the Pawn b2 on "b4," and the black Bishop on "e2." White wins by 1 Bd5!

236—Has a neat try: 3 Kc6?, B × B; 4 P × B, h1 (Q); 5 a8 (Q), Q × P †; 6 Kd7!, Qh3 †!; 7 Kc6, Qh1 †; 8 Kd7, Qh7 †; 9 Kc6, Qe4 †; 10 Kd7, Qe6 † and mate follows.

258—Cooked by C. J. de Feijter. After 1 Ktc6, Kh7!!; 2 Kb8!, Kh8! there is a dual by 3 Ka8!, Kh7 (or 3, Kg8; 4 Ka7, Bc8; 5 Kte7†; or 3, Kg7; 4 Kte7, d4; 5 Ktf5†); 4 Ka7, Bc8; 5 Kb8, Ba6; 6 Kc7. Now we have reached the same position as occurs in the original after Black's first move with the difference that it is now Black's turn to play. Bad would be 6, Kh6 or 6, Kg6, as well as 6, Kg7, and if 6, Kh8, then 7 Ktb4, and 8 Kt × B etc., as White queens with check; or if 6, Kg8, then Kte7† wins at once.

348—Cooked by W. Korn: 3 Be6†, Kh4!; 4 Kf4 also wins.

353—Cooked by A. Chéron, with 6, g1 (Kt)!!. This is a theoretical winning position for Black.

429—Cooked and amended by the author by placing the Knight d4 on "b5," the black King on "e5," and the black Bishop on "c1." The solution now a move shorter starts with 1 Bh1!!, Bd2; 2 Kta7 etc.

444—Cooked by a Russian and corrected by A. Chéron by placing the black Rook on "a2." Variation "A" the same; variation "B": 1, Ra4; 2 d4, Ka2; 3 f4, Ka3; 4 f5, Ra8; 5 Kc4, Ka4; 6 f6 draws.

452—Cooked by A. Chéron. 1. Rg4† or Rd7† wins.

470—Cooked by A. Chéron who demonstrates that white can only draw, viz. 1 Kb2, Rb8†; 2 Kc3, Ra8; 3 Kb3, Rb8†; 4 Kc4, Rc8†!; 5 Kb5, Rb8†; 6 Kc6, Rc8†!; 7 Kb7, Rc3!; 8 Rg8, Rf3!; 9 a4, Rf7†!; 10 Kb6, Rf6†; 11 Kb5, Rf5†; 12 Kc4, Rf4†; 13 Kb3, Rf3†; 14 Kc2, Ra3!!; 15 Ra8, Kg6; 16 Kb2, Rf3!!; 17 a5, Kg7; 18 Ra7†, Kf8; 19 Rb7, Rf6; 20 Rb6, Rf5; drawn e.g. 21 a6, Ra5; 22 Rh6, Kg7!!; 23 Rb6, Kf7; 24 Kb3, Ke7; 25 Kb4, Ra1 =

472—Incorrect. Amended by A. Chéron by placing the white Rook on "f7" and the black King on "b5." Solution is now: 1 Rc7!! (1 Kb7?, Kc5 =), 1, Rd8; 2 Kb7, Rh8; (2, Rf8; 3 Rg7!); 3 Rg7 (3 Rd7?, Kc5 =), 3, Kc5; 4 Kc7, Kd5; 5 Kd7, Ke5; 6 Ke7, Kf5; 7 Kf7, Ra8; 8 Rg1 and wins e.g. 8, Ra7†; 9 Kg8, Ra8†; 10 Kg7, Ra7†; 11 Kh6, Ra6†; 12 Kh5, Ra2; 13 Rg4!

474—Cooked by A. Chéron who demonstrates that there is no win: 1 Kb3, Rf3†; 2 Kb4, Rf4†; 3 Kb5, Rf5†; 4 Kc6, Rf6†; 5 Kd5, Rf5†; 6 Ke6, Ra5; 7 Ra1, Ra4!; 8 Kd5, Kg6!; 9 Kc5, Kf6!!; 10 Kb5, Re4!!; 11 a4, Re5†; 12 Kc4, Re4†!; 13 Kd5(c5), Re5†; 14 Kd4, Ke6; 15 a5, Kd6; 16 a6, Re8 drawn.

478—Cooked by 1 Kf6, Rf2†; 2 Kg7, Ke7 drawn. Amend as follows: Wh. Kf6, Rd6, Ph6/Bl. Ke8, Rg2, Pa3 wins. The solution, now a move shorter, begins: 1 h7, Rh2, etc.

482—Cooked by 4, Kd6!; 5 R × P, R × R; 6 g8 (Q), Rf2† draws. W. Korn suggests the following correction: Place the black King on “d8,” the black Rook on “b3,” and the black Pawn on “a2.” Solution: 1 Ra1 etc.

491—A. Chéron found many duals.

497—Cooked by 5, Ka2 drawing.

539—This ending is anticipated by Marvin F. Palmer, “Iowa News,” 1917.

541—Cooked by A. Chéron: 1 e6, Kf2!; 2 Kte5, Rg1; 3 e7, Rg8; 4 Kc5, Re8!; 5 Ktg6, Ke3; 6 b4, Ke4!; 7 Kd6, Kd4!; 8 b5, Kc4; 9 b6, Kb5; 10 Kc7, Ka6 drawn. He corrected by placing Pawn b3 on “b2” and the white King on “b3.” 1 e6, Re1; 2 Kte5!, Kd4(d2); 3 Ktf3†; if 1, Kd4; 2 Kte5!, Ra1(c1)(h1); 3 e7, Ra8(c8)(h8); 4 Ktf7, Re8; 5 Ktd6!, R × e7; 6 Ktf5†; if 1, Kf4; 2 e7, Re1; 3 Ktf6, R × e7; 4 Ktd5†; if 1, Kf2; 2 Kte5, Ra1(g1)(h1); 3 e7, Ra8(g8)(h8); 4 Ktg4†, K any; 5 Ktf6 wins; if 1, Kd2; 2 Kte5, Ra1(c1)(h1); 3 e7, Ra8(c8)(h8); 4 Ktc4†, K any; 5 Ktd6; if 1, Kd3(f3); 2 Kte5† and 3 e7, finally if 1, Ra1(c1)(g1)(h1); 2 e7 and 3 Ktf6 wins.

564—S. M. Liburkin, having cooked an identical ending of mine published in 1935 in the “Journal de Genève,” sent me his correction just prior to the publication of this book. I just had time to take out my faulty setting and replace it by his. Unfortunately at a later date I found two cooks in Libur-

kin's: A) 3 Ktd6, e × Kt; 4 e7, d5; 5 e8 (Kt), d4; 6 Ktd6, c × Kt; 7 c7, d5; 8 Ra1, d1 (Q); 9 R × Q, d2; 10 c8 (Kt), d3; 11 Ka3, d4; 12 Ktb6, P × Kt; 13 a7, b5; 14 a8 (Kt), b4†; 15 Ka4, b3; 16 Ktb6, b2; 17 Ktc4, b1 (Q); 18 R × Q, d1 (Q); 19 R × Q, d2; 20 Kt × d2, d3; 21 Kte4, d2; 22 Ktf2‡. B) 4 f4, h5; 5 f5, h4; 6 f6, e × f6; 7 e7, f5; 8 e8 (Kt), f4; 9 Ktf6, f3; 10 Ktg4, f2; 11 Kt × f2‡. During the next 30 years I tried many settings of which two published in the "B.C.M.," 1945 & 1946, were also found faulty. Finally a correct setting of mine appeared in "Szachy," 1965: Wh. Kf5, Rd1, Pa6, c6, d2, e6, f7, g4, g6/Bl. Kg1, Qh1, Re8, h2, Ktf1, Pa7, c7, d4, e7, f2, g7, g2, h3; wins: 1 f × R (Kt), d3; 2 Ktf6 (2 Ktd6?, e × Kt and black gets stalemated), 2, g × Kt; 3 g5, P × P; 4 g7, g4; 5 g8 (Kt), g3; 6 Ktf6, P × Kt; 7 Kg6, f5; 8 e7, f4; 9 e8 (Kt), f3; 10 Ktd6, P × Kt; 11 c7, d5; 12 c8 (Kt), d4; 13 Ktb6, P × Kt; 14 a7, b5; 15 a8 (Kt) wins e.g. 15, b4; 16 Ktc7, b3; 17 Kte6, b2; 18 Ktg5, b1 (Q); 19 Kt × f3‡.

571—Cooked by A. Chéron who corrects by placing the Knight on "f6" (thus eliminating the black Pawn). The solution remains the same.

578—Cooked by A. Chéron: 3, Rc6 × Kt†; 4 Kc4, Kg7 wins. Can be mended by adding a white Pawn on "h7."

588—Cooked by 1 Rh4, Ktd3; 2 a3!, b3; (2, P × P; 3 Ra4); 3 a7, Ra6; 4 Rd4†, K any; 5 R × Kt drawn.

651—Cooked by 1 Bc3, Rc1!!; 2 Bd2†, Ke5; 3 B × R, Kd6 draws.

674—Cooked by A. Chéron and reconstructed by him as follows: Wh. Kh7, Re1/Bl. Kf7, Bb3, Pa3, e4; White draws. 1 R × P!, Bc2; (1, a2; 2 Re1, Bc2†, 3 Kh8!); 2 Kh8!, a2; 3 Re1!, (3 Re5?, a1 (R) wins), 3, Bb1; 4 Re5!, (4 R × B?, P × R (R) wins), 4, a1 (R); 5 Ra5, Ba2; 6 Ra7† drawn.

692—Cooked by A. Chéron: 1 Bg4!, and corrected by him by placing the white Rook on "g3." The solution remains the same.

699—Cooked by 3, Kf6 wins.

767—Cooked by 3, $P \times B$ (Q)†; 4 $K \times Q$, Bb6. +

794—A. Chéron points out that the solution is wrong and should read; 8 Ra1!! (Not 8 $R \times b8$ †? as given, as Black draws by 8, $R \times R$; 9 Ra1, (9 Kg3, Bf1); 9, g5; 10 Rh1, g4!; 11 $P \times P$, Rb2†!!; 12 Kg3, (12 Ke3, Rb3†; 13 Kd4, Kh7!); 12, Rb3†; 13 Kh4, (13 Kf4, Kh7); 13, Bg2; 14 Rh2, $B \times P$; 15 g5, Kh7; 16 Kg4, Bf5†; 17 Kh4, Kg6 drawn.) 8, g5; 9 Kg3, g4; 10 $P \times P$ and wins as the black Bishop is lost.

817—Cooked by A. Chéron. There is no win after 1 Kf3, Ba2; 2 Ra4, Kc8; 3 $R \times B$, Kd7; 4 Rd2 (If 4 Ra6, Ktb4; 5 Ra4, Ktc6 or 5 Rb6, Ktd5 =) 4, Ktf6; 5 Kf4, Ke6 draws.

820—Cooked by A. Chéron who found the following dual: 1 g7, Bc4; 2 Rd7, Kta5 or Ktc5; 3 Rd8, Ktd3 or Kte4; 4 Rh8†, K any; 5 g8 (Q)† draws.

822—Cooked by W. Korn: 1 Bf4, Rg2 winning the white pawn drawing. He suggests adding a black Pawn on “g6,” keeping to the original solution. Also cooked by A. Chéron who found the following dual: 1 Bf4, Ra5 (1, Ra7 also draws); 2 b6, Rb5 draws.

826—Cooked by a Russian: 1 Kth5, $K \times Kt$; 2 g7†, Kh6; 3 g8 (R)!, (3 g8 (Q)?, Rf1†; 4 Kh2, Rh1† draws; or 3 g8 (Kt)†?, Kg7; 4 $Kt \times R$, $K \times Kt$ draws), 3, Re6!! /This is the move the composer overlooked/; 4 Kh2, (if 4 Bd7, Rg6† draws; if 4 Rf8, Kg7; 5 Rf7†, Kg8 draws; or if 4 h5, Kh7; 5 Bf7, Re7 draws); 4, Kh7; 5 Bf7, Re2†!; 6 Kh3, Re3†; 7 Kg4, Re7; 8 Bd5, Rg7†; 9 $R \times R$, $K \times R$ drawn.

854—Cooked by: 1 e7, $B \times P$ †; 2 Kd2, Ktf1†; 3 Kc2, Rg8; 4 Bg6, Bf5†; 5 $B \times B$, Kte3†; or if 4 Bg6, Bh5; 5 b7, Rb8 wins. The author has amended as follows: Wh. Kd1, Be4, Pb6, e7, g4/Bl. Kc4, Rg4, Bh5, Kth2 draws. 1 e8 (Q,!) $R \times P$ †; 2 Kd2!, Ktf1†; 3 Kc2!, Kte3†; 4 Kc2, Ktf1†; 5 Kc2, $B \times Q$; 6 b7, Rg8; (6, Ba4†; 7 Kc1, Rb5;

8 Bd3†!, K × B; 9 b8 (Q), R × Q =); 7 Bd5†, K × B;
8 b8 (Q), Ba4†; 9 Kc1, R × Q; stalemate, or if 8,
Bg6†; 9 Kc3!, R × Q echo stalemate.

935—This beautiful old classic is demolished by the startling
2, Kb7!! wins, whilst 2, K × Kt, in the original
solution, only draws.

1053—Cooked by 1 B × f6. The author amends by placing the
Knight d5 on “d3.” The solution remains the same.

1090—Cooked by: 1 g3†, Kh5; 2 g4†, K × P; 3 f7, Qb1;
4 f8 (Q), Ba3†! and if 4 Kte5†, Kh5; 5 Kt × P, Q × B
draws. The author amends by placing the white pawn g2 on
“g3” and the black King on “g4.” The solution is one move
shorter starting with 1 f7 etc.

1123—Cooked by Klaman: 2, Q × Kt; 3 f8 (Q), Q × P† with
perpetual check. Amend by placing a white pawn on “a4.”

1182—Cooked by 6 b3!; 7 P × P, R × B; 8 Qa8†, Ra2
draws. Amended by the author as follows: Place the white
Queen on “a7,” replace the black pawn h5 by a white
one and add a black pawn on “g7.” The solution remains
the same.

1234 MODERN END-GAME STUDIES

Compiled by M.A. Sutherland and H.M. Lommer

This encyclopedia of end-game compositions has long been a classic in the literature of chess. It has instructed and given pleasure to thousands of chess players, and this newly revised edition will challenge and entertain thousands more.

1234 artistic compositions, plus 24 in the appendix, demonstrate when to sacrifice, how to force mate, and, most important, how to end a game as cleverly and as economically as possible. These skillful and often astonishing endings were composed by some 200 chess experts and include many famous examples. Now brought up to date by corrections and by re-evaluations of many endings that have been "cooked" since the book's first publication, this volume is an important addition to the chess player's library.

Corrected reprint of the first (1938) edition. New author's preface. New errata section. Introductions by André Chéron and Dr. J. C. A. Fischer. Appendix. xxiv + 358pp. 5 $\frac{3}{8}$ x 8 $\frac{1}{2}$. T1884 Paperbound \$2.50

A DOVER EDITION DESIGNED FOR YEARS OF USE!

We have made every effort to make this the best book possible. Our paper is opaque, with minimal show-through; it will not discolor or become brittle with age. Pages are sewn in signatures, in the method traditionally used for the best books, and will not drop out, as often happens with paperbacks held together with glue. Books open flat for easy reference. The binding will not crack or split. This is a permanent book.
